

# İsmail Can Karaağaç

Computer Engineering Student

## Personal

- ✉ ismailkaraagac94@gmail.com
- ☎ +905350480728
- 🏠 Sarıyer / Istanbul/ Turkey
- 📅 20/07/2002
- 🌐 [linkedin.com/in/ismail-can-karaagac](https://www.linkedin.com/in/ismail-can-karaagac)
- 🐙 [github.com/cryndry](https://github.com/cryndry)
- ➡ Mobile App Development
- ➡ Front End Development
- ➡ Web Scraping

## Languages

- 🇬🇧 English
- 🇸🇦 Arabic
- 🇪🇸 Spanish
- 🇹🇷 Turkish

## Skills

- 🚀 Flutter
- ⚛️ React
- JS JavaScript
- HTML HTML
- CSS CSS
- 🐍 Python
- 📄 Selenium BS4
- 🗄️ SQL
- 🎨 Figma

## Projects

### Kelime Hazinem

May 2023

### Kelime Hazinem Mobile Application

My project, which entered the Play Store with the "Kelime Hazinem - Arapça Hazine" application, aims to offer applications that help vocabulary learning in various languages, with the aim of publishing new applications for different languages in the future.

## Education

### Istanbul Technical University

October 2021 - Now

### Computer Engineering (100% English)

Computer Engineering 3th Grade  
GPA: 3.25/4.00

## Job Experience

### Vialess (Co-Founder)

September 2022 - March 2023

### Front-End (React) Developer

Vialess was a B2B platform startup project that I took part on foundation. I took on the role of Front-End development. I used ReactJS (HTML, CSS, JavaScript) and Firebase while coding the project. In the following process, we decided to call the project off and terminated it.

### Kitoko

January 2022 - Now

### Web Scraper

I collect lighting product data from various websites using requests, BeautifulSoup4 and Selenium modules of Python language and after data manipulation according to company's needs, I export it to excel with Pandas module and continue to deliver it.

## Certificates

### Google Dijital Atölye (Google Digital Garage)

May 2023

### Application Development with Flutter

I successfully completed the Flutter learning program which covers layout creation techniques, state management, widget tree management and many more topics with Flutter, and I set out to put what I learned into practice with my "Kelime Hazinem" project.

### Meta (Coursera)

May 2023

### Meta React Native Specialization

I successfully completed a comprehensive program consisting of 8 certificates from Meta, the manufacturer of the React framework, focusing on Cross Platform mobile application development with React Native.

### Meta (Coursera)

March 2023

### Meta Front-End Developer Specialization

I successfully completed a comprehensive program consisting of 9 certificates in total, where Meta, the producer of the React framework, focuses on Front-End development with React and also covers design with Figma.

### Uni. of Michigan (Coursera)

March 2023

### Python for Everybody

I successfully completed the Python course which covered Python basics, using BeautifulSoup4 and data management on SQLite3.

### Udemy (Sadık Turan)

July 2022

### Python Programming

I completed this comprehensive Python course that covered Python basics, web scraping with Python (BeautifulSoup4, Selenium), data manipulation (Pandas), data management (SQL). After completing the web scraping part of this course, I was accepted for my current role at Kitoko.
